One selected method per integration
Accepted state (t, y)
Selected method and step proposal h
DOPRI5: 7 explicit stages
Reuse accepted endpoint RHS
RODAS5P: build / reuse J
Factor W once; 8 serial stage solves
Finite candidate + embedded error
Weighted RMS acceptance test
Reject: retain (t, y)
Reduce requested step
Accept: publish new (t, y)
Update controller
Fatal failure: stop
Return accepted partial state
