Exact-arithmetic contraction
Conditional on a dissipative metric
Uniform $q_* = |r-1|/(r+1)$
Contraction factor
0.0
0.2
0.4
0.6
0.8
10^{-1}
10^{0}
10^{1}
Shift ratio $r = a/a_0$
Finite-precision iteration
25/27 reach the residual target
Relaxed iteration count
10^{0}
10^{1}
10^{2}
diagonal
damped nonnormal
skew
10^{-1}
10^{0}
10^{1}
Shift ratio $r = a/a_0$
